WHY WEYTEC

SYSTEM SURVEILLANCE

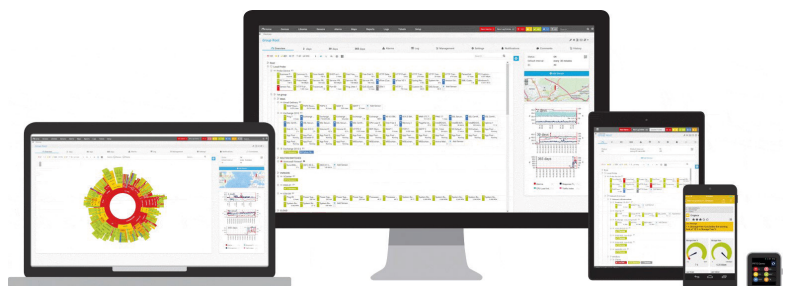

... SNMP-based with
active alerting

The PRTG network monitoring tool from Paessler AG is a web application that can be installed on any Windows computer. PRTG provides users with a direct overview of system components, displaying their operationally relevant status on web pages. This overview assists in ensuring the smooth operation of a WDP (WEYTEC distributionPLATFORM) environment and provides various alarm options to ensure fast support.

- Accurate and real-time monitoring of all IP-based components in the WDP network
- HTML-based, runs on WDP maintenance PC
- Provides an overview of all supported network components
- Monitoring of device and service status
- Displaying errors and non-accessible devices in color
- Triggers external alarms
- SNMP-based
- Alarm transmission to mobile phones and pagers
- Compatible and integrated with WEYTEC KVM products and solutions

User access

Users can access the platform in a variety of ways. There is powerful browser access, reduced mobile browser access, a Windows GUI and various apps for iOS and Android. PRTG Desktop can manage multiple core systems simultaneously.

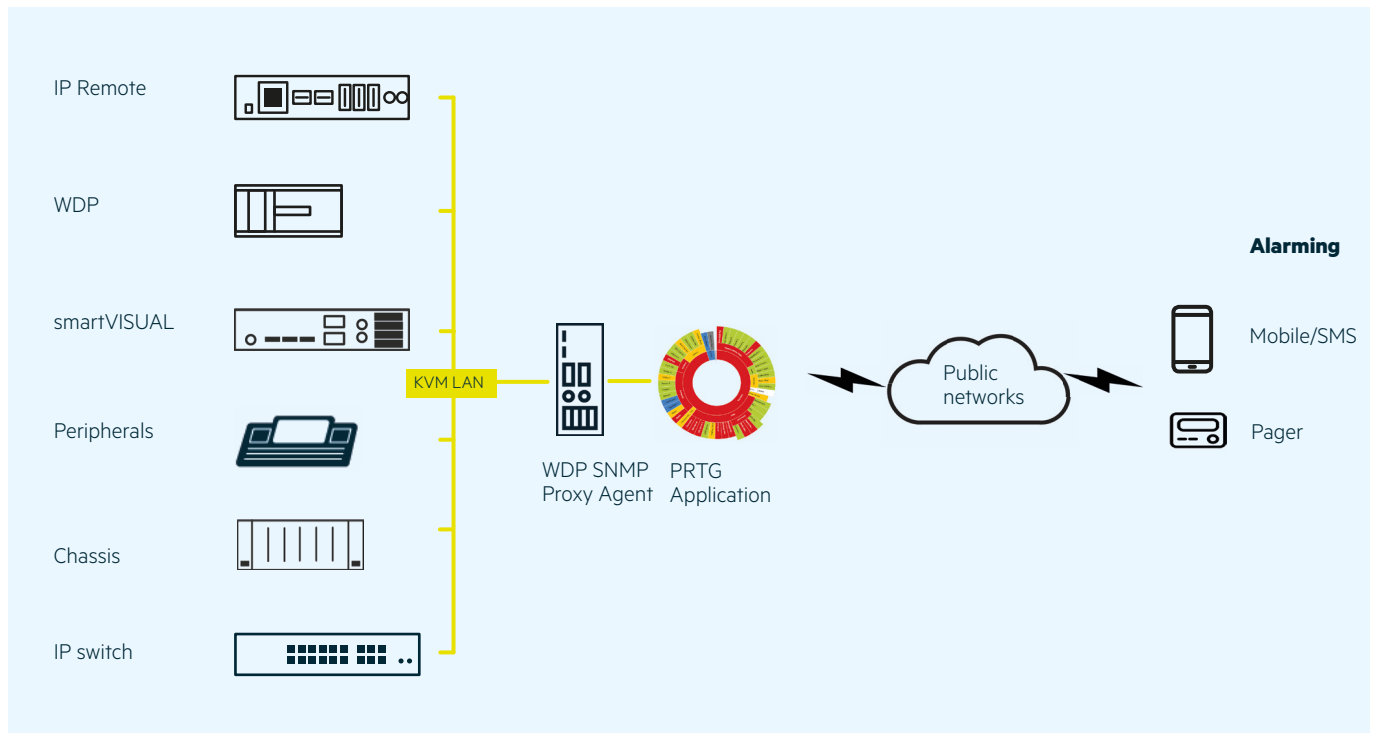

WHY WEYTEC

SMS INTEGRATION

... for immediate alarm
notification

Application example

The PRTG application provides the central link between all IP-based WEYTEC and third party components to alerting end-points. PRTG queries individual components and compares their actual values with reference values. There are multiple protocols and query types, such as SNMP and ping.

Available products and solutions

Art. No.	Description
25313	WDP SNMP Proxy Agent Service
25231	PRTG Network Monitor up to 500 sensors
25232	PRTG Network Monitor up to 1000 sensors
25233	PRTG Network Monitor up to 2500 sensors
25234	PRTG Network Monitor up to 5000 sensors
22771A408FA_MT	ultraFLEX miniPC V2, I5-6442EQ, 8GB RAM, mSATA 500GB (inkl. OS Win10)
22288	SMS Gateway SMSEAGLE NXS-9700-3G, excluding SIM card (optional)
